## TECHNOLOGIES AND LANGUAGES

---

Java, C#, HTML, CSS, Bootstrap, SQL, Javascript, JQuery, NodeJS, React, PHP, Flutter, FireBase, MySQL, Visual Studio, Git, GitHub, Postman, Cisco, Adobe Photoshop, Adobe Premiere pro

## EXPERIENCE

---

### IT Operation (Internship)

Concentrix

February - May 2025

Makati, Metro Manila

- Maintained and troubleshooted multiple computers and systems as well as the updates of different softwares.
- Optimized the server hubs and performed multiple routing network checks. Also, deployment of access points and other devices.

## PROJECTS

---

### KONTAK Android Application | Dart, Flutter, Firebase, Google Maps API, Visual Studio Code

- Developed an Android application for immediate access to essential emergency services and real-time information during critical situations.
- Developed the KONTAK app using Dart and Flutter, integrating Firebase for authentication and real-time database services within an Agile Software Development Life Cycle environment.
- Utilized Google Maps API for realtime integration of location and use of Google Play services for deployment of the application.

### FOUND IT Application | HTML, CSS, Javascript, Bootstrap, Figma

- Developed a Lost and Found website that helps people quickly reunite with lost items and pets by allowing users to post descriptions, photos, and connect with others to find them.
- Used Figma in visualizing the User Interface designs.
