Java, C#, HTML, CSS, Bootstrap, SQL, Javascript, JQuery, NodeJS, PHP, Flutter, FireBase, MySQL, Visual Studio, Git, GitHub, Cisco, Adobe Photoshop, Adobe Premiere pro

EXPERIENCE

IT Operation (Internship)   February - May 2025
Concentrix   Makati, Metro Manila
- Maintained and troubleshooted multiple computers and systems as well as the updates of different softwares.
- Optimized the server hubs and performed multiple routing network checks. Also, deployment of access points and other devices.

PROJECTS

KONTAK Android Application | Dart, Flutter, Firebase, Google Maps API, Visual Studio Code
- Developed an Android application for immediate access to essential emergency services and real-time information during critical situations.
- Developed the KONTAK app using Dart and Flutter, integrating Firebase for authentication and real-time database services within an Agile Software Development Life Cycle environment.
- Utilized Google Maps API for realtime integration of location and use of Google Play services for deployment of the application.

FOUND IT Application | HTML, CSS, Javascript, Bootstrap, Figma
- Developed a Lost and Found website that helps people quickly reunite with lost items and pets by allowing users to post descriptions, photos, and connect with others to find them.
- Used Figma in visualizing the User Interface designs.
